

HD WIDE ANGLE CONVERSION LENS SERIES

Wide Angle Conversion Lens

M5845HD

0.45x for Prosumer and DSLR

**Capture Ultra Wide HD
Video and Pictures**

The **M5845HD** wide angle conversion lens is designed for prosumer and DSLR to capture High Definition video and pictures.

The optical lens system is constructed using 2 element HD optical glass, grounded and polished to meet the highest possible optical sharpness and clarity. When mounted on prosumer or DSLR cameras, it enables the field of view to increase by more than 50%. Each optical glass is multi coated, allowing maximum light transmission while at the same time reduces flares and ghosting.

Other essential features includes sure grip for easy lens removal, macro attachment, darken glass edges and pro semi matt black housing to minimize external flare for superior image reproduction. The availability of front filter threads in 77mm allows the placement of filters for other effects.

18mm Standard Lens
