

PRO HD CONVERSION LENS SERIES

Wide Angle Conversion Lens

PRO5870HD

0.7x for DSLR Lenses

Capture More HD Details with edge to edge clarity

The **PRO5870HD** Wide angle conversion lens is designed exclusively to be used in conjunction with lens for DSLR.

When mounted on accompanying DSLR lens, the **PRO5870HD** conversion lens is able to produce high quality image with 25% more field of view that are free from vignette, made possible only with the high performance optical lens system.

Each high performance glass elements used in the optical system are further treated with multi layer of anti reflection coating, thereby ensuring higher level of light transmission and low level of reflection for wider, brighter and clearer picture.

18mm Standard Lens

With PRO5870HD
