

PRO HD PLUS CONVERSION LENS SERIES

Wide Angle Conversion Lens

PRO6770HDP

0.7x Ultra HD for DSLR
Capture Wider HD details
with Ultra low distortion

The **PRO6770HD PLUS** Wide angle conversion lens is designed exclusively for the discerning professionals who demanded highest definition wide images without any compromise on image distortion.

Engineered to perfection, the **PRO6770HDP** lens enables the standard field of view to increase by approximate 25% when attached to DSLR camera lens. High definition fine and non distorted images are achieved using a combination of two precise polished optical glass elements which enable a high resolution power of 400 lines/mm at centre.

All optical elements used within this system are treated with broadband multi layer anti reflection coating which increase light transmission to over 99% and ultra low reflection below 1% for wider, brighter and clearer picture.

18mm Standard Lens

With PRO6770HDP

PRO6770HDP SPECIFICATION
